Libbey

Libbey hails originally from East Cambridge, Massachusetts, home of the New England Glass Company which was founded in 1818. In 1888, Edward Drummond Libbey, son of the first corporate owner, William, moved the company to Toledo, Ohio. The Northwest Ohio area offered abundant natural gas resources and access to large deposits of high quality sand. Toledo also had a network of railroad and steamship lines, making it an ideal location for the company. In 1892, the name was changed to The Libbey Glass Company. Libbey and Toledo were a match made in heaven and thus the glass city was born.

Safedge® Rim Guarantee

For over 70 years, Libbey's proven commitment to quality has been backed by our well-known guarantee, "a new glass if the rim of a Safedge glass chips." If the rim of any glass covered by the safedge guarantee chips, Libbey will replace or refund the price of the glass when it is returned to the dealer/distributor from whom it was originally purchased. Of course, this guarantee does not cover breakage.

Finedge®

Finegde glassware features a minimum bead and is available on a variety of tumblers and stemware. This finely rimmed glass-ware brings subtle beauty to any establishment.

Safedge® Rim and Foot Guarantee

If the rim or foot of any one-piece stemware item chips, Libbey guarantees to replace or refund the price of the glass when it is returned to the dealer/distributor from whom it was originally purchased.

This quarantee covers such lines as Embassy, Embassy Royale, Lexington, Catalina, Teadrop, Perception, etc. This quarantee does not cover breakage.

Heat-Treated Glassware

Libbey's heat-treated tumblers and stemware are created through a special heating and rapid cooling process after the glass is formed. This secondary process on the "blown" glassware is performed only on the upper portion of the glass where most abuse occurs.

Libbey's heat-treated glassware offers increased resistance to thermal and mechanical shock and is recommended for fast service cycle operations.

Sheer Rim/D.T.E.®

Libbey's Sheer Rim/D.T.E. (Dura Temp Edge) stemware and tumblers feature a beadless edge which is first cracked-off then polished to produce a fine, yet durable edge. This creates a combination of elegance and affordability in glassware for operators looking to upgrade their beverage service, while still maintaining longer service life.Sheer Rim/D.T.E. Tumblers and Stemware are guaranteed against chipping of the Rim.

DuraTuff®

The Libbey DuraTuff treatment is a special thermal afterprocess for „pressed" tumblers and stemware such as Gibraltar, Inverness, Everest, Paneled Tumbler, Dakota and Endeavour. The DuraTuff process is performed only on the upper portion of pressed tumblers and stemware to increase their resistance to thermal and mechanical shock. Libbey's DuraTuff process produces durable glassware with prolonged service life for the foodservice industry. Look for the DuraTuff name embossed on all Libbey DuraTuff products.

Spiegelau Nachtmann

The first recorded mention of the Spiegelau factory is in the last will and testament of Erasmus Mospurger, dated 1521.

In the sixteenth century, when mirrors were popular in royal courts, the company produced fine glass mirrors, beads and decorative bottles. In 1845 the factory produced snuff bottles, which was all the rage.
http://www.spiegelau.com/info/history/

In 1834 Glassmaker Michael Nachtmann founded the company F.X. Nachtmann. Initially, the company manufactured its products at its Unterhütte site near Herzogau in the Bavarian Forest, Ödhütte near Furth im Wald and Seebachhütte near Eisenstein in Bavaria.

Muddlers

Since barkeepers are using fresh ingredients for cocktails,
they do also use a new technique – muddling.
Flavours of fruits, herbs or spices are extracted by using
a long muddler directly in the shaker.
The most favourite example – a fresh caipirinha.

Bottle Openers

Beside the classic corkscrew, the gastronomy uses a so called waiter`s knife. The exemplar is available in different colours. Little opener, great helper: The bottle cap opener may be mounted on the wall and is a space-saving helper. The gastronomy uses a so called waiter`s knife. At first, the crown cap is removed by knife. Afterwards, the spiral is screwed in as far as possible. At last, the lever is set at the bottle neck to push out the cork by lever action. The corkscrew has a separate bottle cap opener.

The Porthole is a simple, beautiful infusion vessel designed by Martin Kastner of Crucial Detail design studio. It can be used to create striking cocktails, teas, dressings, lemonade, coffee, or any other type of cold infusion. Since its debut in 2011, the Porthole has gained significant attention. Originally created as a custom piece for the bar chefs at The Aviary in Chicago, IL, it has been featured in dozens of magazines and blogs, including the cover of Food Arts magazine.

Shakers

The Boston Shaker is made up of a large stainless steel tin and a smaller mixing glass. It ist especially suitable for shaken drinks. To fill in the drink, you may take a strainer, professionals may even strain the drink between tin and mixing glass. The threepart Boston Shaker has an attached top part with an integrated strainer and a closing cap. Due to the integrated strainer, it is much easier to get creamy cocktails. The closing cap might also be used for measuring. The French Shaker, very common in Europe and the USA, only has a closing cap. For to fill in the drink, you may take a strainer, professionals may even strain the drink between tin and mixing glass.

Glassracks

Our individual glass racks help you to carry your glasses and will fit in every 50x50 dishwasher.
„Base“ stands for the amount of glasses you can put into the rack (e.g. 16 glasses, 49 glasses etc.). Please note:
Please note, this is only your basic rack. After having chosen the right one, you will need further extenders to give your glassrack the right height which you also find in our shop. For choosing the right size for your basic rack:
Please meter calibre and height of the glass you wish to put into the rack.

HBS1200-CE • Revolutionary
Get the right portion of ice every time with the Revolution™ portion system.

- Revolution™ Portion System -

  Let operators select serving size and number of servings for precise results.
- Specifications:
  Standard: Unit comes with base, ice chute, 2 piece hopper with lid, 64 oz. polycarbonate container & leveling feet

HBH850-CE Summit®Blender

- Wave~Action™ System*
- Auto Blend „One Touch Sensor Blending" -

- Hundreds of Pre-Programmed Cycles -
  Reduces the need to select different cycles for different drinks to free up decision-making time.
- Automatic Shutoff -
  As soon as the mixture reaches the perfect creamy drink profile/consistency, the blender stops to help prevent over- and under-blending.
- Cavitation Control -
  Detects when cavitation occurs and prompts the operator to add more liquid. Keeps the operator from spending time watching the blender and from serving a bad drink.
- Airflow Baffle -
  Constantly circulates cool air around the motor for back-toback blending and longer blender life.

Sanitize glassware thoroughly with just one simple touch. If you ever wondered why the cocktails served in the most trend setting bars tend to taste so much better, the answer may lie not in the contents of the glass but within the glass itself. A glass that has been perfectly cleaned, sanitized, and chilled, helps keep drinks colder for longer, removes unpleasant residual odours and enhances the flavour of drinks.

Custom-Made

Are you someone who loves practical, lasting things which radiate your own unique style and charm? Then perhaps we have a vessel for you to fill with details and ideas that are all your own! Create an individual design for the glasses or even draw up your own entire line. Choose from beautiful patterns and designs that will instantly give your glasses that perfect „must-have“ quality. Use glassware with a pattern surrounding your logo as a great way to advertise...

Looking for the perfect gift for customers, family and friends? The possibilities are endless...

Having your own logo on a bar tool or glasses gives your personal image a unique character. Of course there are many more tools we can print on. Here we only give you an idea of what is possible.

If you are interested or if you have any questions, please don´t hesitate to contact us.

Custom-made stirrers.
We print stirrers that we have on stock within one week from 1000pcs. up. Custom made moulds are available for a minimum of 50.000pcs.

Print on Vinyl
Barblades with vinyl coating are perfect as a gift for promo-tional business.

We are able to print logos which **look like they are laser engraved.** This special printing technique is done by silk screen process. Different colours are also available and much less in price compared to high price laser engra-ving. We print on stainless steel with pad- and silk screen machines. Due to a special pre-treatment long lasting prints are possible even on highly polished surfaces like shakers. Multi-coloured logos are also possible. A permanent logo is achived by laser engraving on stainless steel products. We can also polish after laser application for a more subtile apprearence of your logo – ask your sales person for details.

Print on Wood
Print, laser marking and hot stamping is available for wooden products.

Print on Vinyl Shakers
Cocktail Shakers with vinyl coa-ting are perfect for promotions. Not only are these shakers very popular due to their grip and insulation effect, prints in multi colour are possible with good visibility.

Vinyl Colours
From orders above 300pcs. we produce every PANTONE COLOUR for you.

We print on our regular bottle pourers –
on the spout, collar or wherever it's possible. Custom-moulded pourers can be developed for all kinds of markets. Tell us about your needs.

1 Colour
Every Pantone Colour is possible.

3 Colours
Silver and gold are also possible.

Special shapes and positions
No matter if the glass has a handle, is curved or V-shaped or the customer wants an unusual printing position like on the base or vertically; we will find a way.

2 Colours
90% of all our customers have 2-colour printings.

4 Colours
Silver and gold are also possible.

Satin Etch
Looks like engraved or etched. As a very popular trend continues, we keep track of our customer's whishes. „Less is often more". Instead of printing multi coloured logos with too much details, we print a special colour named satin etch. This subtle colour can range from solid white to nearly transparent. This look gives the glass an elegant attitude.

Outlet & Brand Logo
We produce your glasses with your brand logo, store them and add an outlet logo upon order and ship it individually to the customer in time.

Front & Rear
Small quantities for shows and events.

Irregular Printing Positions
We can reuse the same printing plates for different glasses. You define one size and you can get a series of different glasses with the logo at different positions. By repeat orders or orders with different products, we can provide small qntys even if the printing position is uncommon or irregular.

Capacity Lines
We have a licence to print capacity lines with CE approval.
